```
[ ]: Write a Python program to calculate the length of a string  
without using built in function  
and check whether it is a palindrome or not.
```

```
[3]: str = input("Enter a string: ")  
count = 0  
for ch in str:  
    count = count + 1  
print("length of the string is", count)  
  
rev = str[::-1]  
if (rev == str):  
    print("the given string is a palindrome")  
else:  
    print("the given string is not a palindrome")
```

```
Enter a string: good morning  
length of the string is 12  
the given string is not a palindrome
```

```
[ ]:
```
