```
[ ]: 3.Write a Python function that accepts a sentence from the user
     and counts the number of words in the sentence.

     i/p : How are you
     o/p : There are 3 words
```

```python
[5]: def count(S):
         L = S.split()
         print(L)
         print("There are",len(L),"words")
         #for word in L:
         #    print(word," : ", len(word))

     str = input("Enter a sentence : ")
     count(str)
```

```
Enter a sentence : good morning
['good', 'morning']
There are 2 words
```
